PROJECTS

Connect Four Game [🔗](#)

- Engineered a web-based React implementation of Connect Four with logic for two-player gameplay and automatic winner/draw detection.
- Implemented state-driven UI features including dark/light mode toggle, sound effects, and game reset functionality.
- Architected the project using modular components and utility functions to ensure code maintainability and scalability.
- Github Repo [🔗](#)

Full-Stack Recipe Application [🔗](#)

- Developed a full-stack application using the MERN stack (MongoDB, Express, React, Node.js) featuring secure user authentication via JWT.
- Designed a responsive UI with Tailwind CSS and Lucide icons, implementing protected routes for authorized user access.
- Integrated advanced search functionality and recipe management features to enhance user engagement.
